- A. This solicitation is hereby extended from 18 Aug 2003 until 16 Sept 2003. The closing time will remain 3:00 pm EST.
- B. The purpose of this amendment is to incorporate changes in Section J of solicitation SP0600-03-R-0071.
 1. In section J1.3, Specific Service Requirements, remove the second paragraph "Offeror shall replace overhead electrical lines with underground service when the existing overhead lines reach the end of their service life. New or renewal electrical lines will placed underground." (**Highlighted in bold text**):

J1.3 Specific Service Requirements

The service requirements for the MacDill AFB electric distribution system are as defined in the Section C, *Description/Specifications/Work Statement*. The following requirements are specific to the MacDill AFB electric distribution system and are in addition to those found in Section C. If there is a conflict between requirements described below and Section C, the requirements listed below take precedence over those found in Section C.

Offeror shall replace overhead electrical lines with underground service when the existing overhead lines reach the end of their service life. New or renewal electrical lines will placed underground.

For areas where conduit or ductbank is installed under hard surfaces, especially parking lots and roads, we use, where feasible, directional boring or jack/bore drilling techniques. Under soft surfaces (green spaces), cut and cover may be used. However, in areas that have extensive landscaping, it may be more economical to use directional boring, to prevent replacing expensive shrubbery or trees.

2. In section J1.11, Government Recognized System Deficiencies, after the second sentence insert the following: "The listing reflects the base's short term plan and intent to bury main overhead distribution lines in an effort to reduce/eliminate unscheduled outages due to lightning, animal interference, and overloading." (**Insertion highlighted in bold text**):

J1.11 Government Recognized System Deficiencies

Table 8 provides a listing of system improvements that the Government has planned. The Government recognizes these improvement projects as representing current deficiencies associated with the MacDill AFB electric distribution system.

The following paragraph is hereby added to Section J1.11:

The listing reflects the base's short term plan and intent to bury main overhead distribution lines in an effort to reduce/eliminate unscheduled outages due to lightning, animal interference, and overloading. It is also the base's intent to replace overhead lines with buried lines at the end of the service life.

If the system is sold, the Government will not accomplish these planned improvements. The Contractor shall make a determination as to its actual need to accomplish and the timing of any and all such planned improvements. Capital upgrade projects shall be proposed through the Capital Upgrades and Renewal and Replacement Plan process and will be recovered through Schedule L-3. Renewal and Replacement projects will be recovered through Sub-CLIN AB.

3. Attachment J39, PAST PERFORMANCE QUESTIONNAIRE is hereby **deleted** in its entirety.
