

FLEET COMMANDER

Fleet commander is a useful reporting and analysis tool designed specifically to assist fleet managers in the management of their fleets. It was developed in response to fleet managers' requests for more information about their fuel maintenance and repair purchases, along with the drivers and vehicles involved in those purchases.

Transaction data in Fleet Commander comes from the oil companies and maintenance merchants, or the point of sale equipment, attendant on duty, etc. Data for one visit to a gas station may or may not be bundled into one transaction when it arrives at Voyager. In Fleet Commander, all product detail is presented separately; multiple products sold on the same transaction are displayed as separate entries with a common transaction number.

Fleet Commander's flexibility allows the fleet manager to set the parameters by which their data will be viewed for analysis. This, in turn, generates useful results for spotting trends and tracking costs.

Fleet Commander can create specialized reports, view buying patterns, and identify trends specific to an organization's fleet buying activities. Users of Fleet Commander are able to:

- Select the information that will appear in each view
- Use filters to find incidents not within fueling policy (fraud)
- Save and recall as many different views as needed
- Print data, export data, or convert data to graphs
- Refresh data as often as daily via the Internet
- Activate a pop-up window from any view that has all the details of a transaction

To apply for Fleet Commander complete the attached and FAX to 800-987-6592.

Enrollment Form

Please complete the following information to set-up each user. Thank you.

Account Name	
Account Number	
Agency/Organization Name	
Operating System (Windows Ver)	
Internet Explorer Version	
Job Title	
First Name	
Middle Initial	
Last Name	
Telephone Number	
Fax Number	
Desired Password*	
Email Address**	
Street Address	
City	
State	
Zip	

Signature

Date

MANDATORY SYSTEM REQUIREMENTS

- Pentium 300mhz or faster
- 256 MB of Ram or better
- Windows 95, 98, NT, or 2000
- Disk space of 5 MB to install the application plus 2.5 KB per transaction
- Graphics / Video of 1024x768 with 256 colors
- Microsoft Internet Explorer version 4.0 or better with connection faster than 5KB per second

***Passwords must be at least 7 characters (lower case alpha or numeric) and must begin with a letter**

****The Email Address will be used as your FleetCommander Login ID.**
